CLINICAL TRIAL ROUNDS

Anyone interested in learning more about clinical trials is welcome to attend!

TOPIC: Trials of Complex Interventions: What, Why, Where, and How

Nancy Mayo, PhD, MSc, BSc(PT)

Nancy Mayo is a Distinguished James McGill Professor, Department of Medicine (Divisions of Geriatrics, Experimental Medicine, and Clinical Epidemiology), and the School of Physical and Occupational Therapy (SPOT), McGill University. Trained originally as a Physical Therapist, Dr. Mayo holds a PhD in Epidemiology and Biostatistics. She leads a research program on Function, Disability and Quality of Life in Canada's Vulnerable Populations producing more than 350 scholarly works. Methodologically she specializes in measurement of health outcomes, design and analysis of complex interventions, and optimizing methods and analyses for rich data producing more than 350 scholarly works. Professor Mayo published her first trial in 1981 and has conducted and has since conducted or participated in more than 25 trials, all of complex interventions.
