RI-MUHC ACT-CTU

PROTOCOL REVIEW SESSIONS

A clinical trial proposal will be presented followed by a discussion period with the audience and a panel of experts for an exchange of ideas on how to enhance the proposed study. These sessions are active participation forums to provide the presenter with real time feedback on their trial.

Anyone interested in learning about important considerations in clinical trial design and planning is welcome to attend!

For more information on this initiative, please visit www.act-aec.ca

Presenter

Nader Sadeghi, MD, FRCSC

Topic: Neoadjuvant immuno-chemotherapy and de-escalated transoral robotic surgery for HPV related oropharyngeal cancer

Wednesday, March 27th, 2024 from 4:30-5pm (*please note the time change)

Hybrid Seminar ; In-person @ Glen site – Room B02.9390

(in-person attendance is encouraged for active discussion)

Virtually: Please contact Amanda Lovato @ amanda.lovato@rimuhc.ca for the link

****Please register in advance by sending a message to amanda.lovato@rimuhc.ca with your research area of expertise and specifications for whether you will attend in person or online****

For more information or to request a spot to present your clinical trial proposal for feedback at a future session, please contact RI-MUHC ACT-CTU Project Manager, Amanda Lovato @ amanda.lovato@rimuhc.ca
