

**35th Doctor Dorothy Wiselberg Seminar
Interstitial Lung Diseases – From Genes to End of Life
May 30, 2025 : 8:00 AM – 4:15 PM
Hybrid: MUHC Glen - Cruess Amphitheatre ES1-1129 & Zoom**

07:30 REGISTRATION AND COFFEE

07:50 Welcome and Introduction

08:00 Patient's Perspectives

Environment and ILD

08:15 How air pollution impacts autoimmune-related ILD
Dr. Sasha Bernatsky, McGill University

08:45 Is hypersensitivity pneumonitis without antigen really HP?
Dr. Julie Morisset, Université de Montréal

09:15 Sex/gender differences and disparities in ILD
Dr. Deborah Assayag, McGill University

09:45: The interaction between ILD and lung cancer: From risk factors to therapies
Dr. Carmela Pepe, McGill University

10:15 HEALTH BREAK

Biomarkers, Genetics and ILD

10:45 Race, telomeres and ILD survival
Dr. Ayodeji Adegunsoye, University of Chicago

11:15 Biomarkers in autoimmune-related ILD
Dr. David Langlais, McGill University

11:45 Genetics of ILD, is all ILD familial?
Dr. Raphael Borie, Hôpital Bichat - Claude-Bernard

12:15 Optical microscopic imaging in ILD
Dr. Lida Hariri

12:45 LUNCH

2025 Wiselberg Lecture

13:30 From lung fibroblasts to clinical trials – A journey of IPF and ILD treatment
Dr. Martin Kolb, McMaster University

Drugs in ILD

14:30 Drug repurposing using computational biology
Dr. Jun Ding, McGill University

15:00 Is treating PH in ILD a good idea?
Dr. Steeve Provencher, Université Laval

15:30 Frailty, symptoms, adverse events, and ILD drugs
Dr. Tejaswini Kulkarni, University of Alabama at Birmingham

16:00 CLOSING REMARKS
