

# Child Health and Human Development Program

## MONDAY NOON SEMINARS

### Roberta La Piana, MD, PhD

Assistant Professor, Department of Neurology & Neurosurgery, Montreal Neurological Institute-Hospital  
Associate Member, Department of Diagnostic Radiology, McGill University

**December 6, 2021, 12-1 PM**

**Genetic leukoencephalopathies with adult onset:  
A continuum with the pediatric forms or distinct entities?**

## Seminar Highlights

- Phenotypic and genetic differences between classic genetic leukoencephalopathies presenting in children versus adult patients
- Distinct forms of genetic white matter diseases presenting exclusively in adult patients
- Importance of the transfer of care and the collaborative research work between experts in pediatric and adult forms
